Humavue

by VisionX Software

People, time and HR operations in one company workspace.

People and structure

Employee profiles, departments, designations, directory and lifecycle workflows.

Time, leave and payroll

Attendance and shifts, leave requests and allocations, salary structures, payroll review and payslips.

Hiring, development and work

Recruitment, onboarding, performance, learning, tasks, communications and employee self-service.

Access and accountability

Company-scoped access, authenticator settings, session controls, user administration and filtered audit records. Availability depends on role and configuration.

Resources

Online user and administrator guides, interactive fictional tour, captioned walkthrough and recovery runbook. Open Resources from the Humavue website.

Responsible evaluation

VisionX trial activation stays closed until owner approval. A trial creates a separate new company; existing identities and companies are preserved. Prepared expiry and usage safeguards require separate approval before trials open.
